

Christopher Riewaldt

Software Engineer - New York, NY | criewaldt@gmail.com | (347) 814-5715

BIO

I am a creative, self-starting technologist with a passion for problem-solving and assisting others. Proficient in full-stack development with a focus on server-side using Django.

LIST OF SKILLS

Python, Django, Django Rest Framework, ORM, SQL, Postgres, JS, CSS/HTML, Heroku, GitHub, Agile, Scrum, Automated Testing, Unit Testing, Scripting, DSLC, Jira, Data Migration, and more.

I love working on personal projects in my spare time. I tend to use: **Django Rest Framework, Django-Filters, AWS S3, and Heroku**

- Developed a real estate listing website for real estate agents to easily post listings and communicate with potential buyers and sellers
- Developed software to easily maintain data relationship integrity when migrating records across environments
- Developed a ticket-based support management system for KM Associates of NY, Inc.
- Developed software to gather Department of Buildings application data, including permit and violation information, utilizing the NYC OpenData API
- Built various websites for serviced-based local businesses

WORK EXPERIENCE

Global Administrator | Microsoft & Salesforce – KM Associates of NY, Inc., New York, NY

2021 - PRESENT

- Instrumental in building and maintaining custom Salesforce org and other technology
- Developed custom Salesforce org from concept to launch- working with stakeholders to leverage software systems to complement internal business processes
- Designed a project weighing system that provided custom reports and operational recommendations to the Executive team
- Created Django projects to extract and output specific data from multiple OpenDataNYC API endpoints into an easily consumable interface
- Developed Python scripts to support business processes including data migration from legacy systems, and statistical analysis for marketing and advertising
- Participated in regular meetings with the Executive, Operations, and Project Management teams to determine business requirements for custom Salesforce apps
- Actively participated in daily stand-ups, sprint and release planning, retrospectives, and other agile ceremonies
- Owned bug-fix solutions and ensured they were built and delivered to the end-users
- Supported external Salesforce developers, focusing on day-to-day development, configuration, core infrastructure, and build deadlines

Listings Manager – New York Living Solutions, New York, NY 2016 - 2018

- Created software to automate advertising generation. Over 2 million ads were served using Python and Selenium

Onondaga Community College – Syracuse, NY— Music A.S. 2004-2007
